

Large Industrial Portable Fans

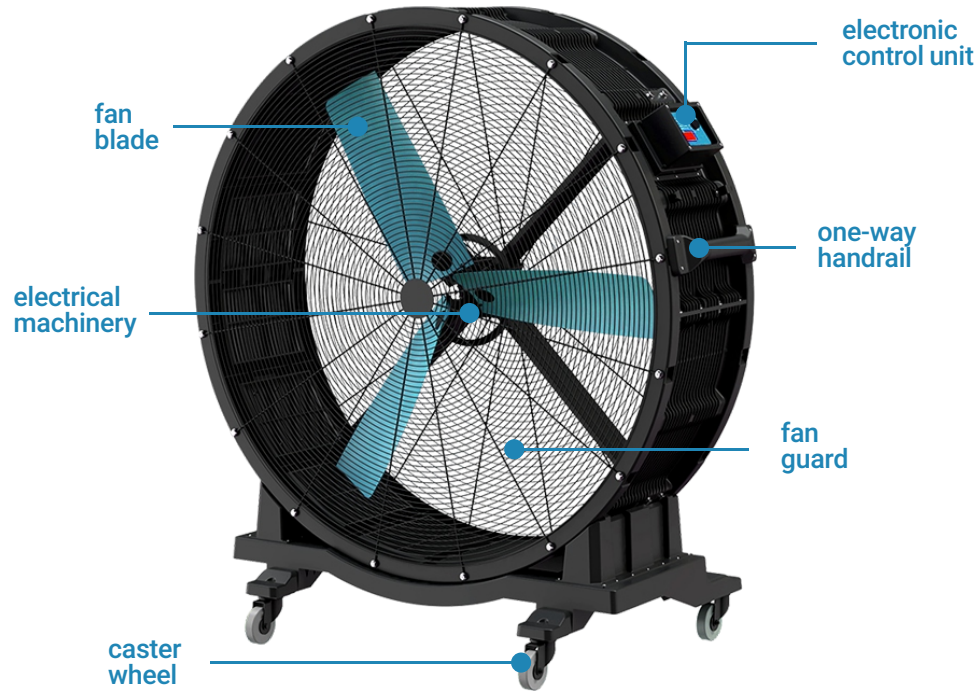

Experience the ultimate in versatile ventilation with our large industrial portable fans. Designed for powerful performance and easy mobility, these fans are perfect for a variety of industrial and commercial applications. Whether you need to cool down a specific area, improve air circulation, or ventilate large spaces, our portable fans deliver reliable and efficient airflow.

1. **High Airflow Capacity:** Our large industrial fans are engineered to move substantial volumes of air, providing effective cooling and ventilation for extensive areas.
2. **Portability:** Equipped with sturdy wheels and a lightweight design, these fans can be easily moved to different locations as needed, offering flexible ventilation solutions.
3. **Durable Construction:** Built to withstand harsh industrial environments, our fans are made from robust materials ensuring longevity and consistent performance.
4. **Adjustable Settings:** Customize the airflow to suit your specific needs with adjustable speed settings and directional airflow control.
5. **Quiet Operation:** Designed to operate with minimal noise, our fans ensure a comfortable and productive work environment.

Model	Air Volume (m ³ /h)	Applicable Area (m ²)	Air Supply Distance (m)	Power Supply	Power (W)	Weight (kg)	Fan Blade Diameter	Size (mm)
FJ-48	38000	400-500	30-40	220V/50Hz	600	60	1.25m	1510*790*1680

Safety Net Cover
