

COMPANY PROFILE

Ningbo Yiyi Network Technology Group Co., Ltd., as the overseas service center of Zhejiang Shiteng Technology Group Co., Ltd., is a digital supply chain service supplier, founded in 2009 and headquartered in Ningbo.

Shiteng group is mainly engaged in the research and development, design, production, sales, construction and operation and maintenance of intelligent traffic security, landscape lighting, garden sanitation, municipal pipeline network, pumps, valves and fittings, factory warehousing, heating, cooling and ventilation, artificial turf, suspended flooring, and construction machinery, providing one-stop solutions and services.

Currently, we cooperate with more than 5,000 manufacturing enterprises and serve nearly 200,000 enterprise customers. With 15 supply chain companies, over 80 sales subsidiaries and product companies, more than 1,000 people in the service team, our digital management capabilities and comprehensive service capabilities are at the forefront of the industry.

Mobile Industry Fan

As an earlier model of HVLS fan, Feng Yang fans have been selling well for over a decade. Which are equipped with a German brand reduction motor with high torque. The overall has safety protection that their accessories comply with industrial standards, so it's suitable for various harsh industrial occasions.

The Feng Fan fan, equipped with permanent magnet brushless synchronous motor, has the characteristics of safety, silence, small size, and maintenance free, which is a superior industrial large fan.

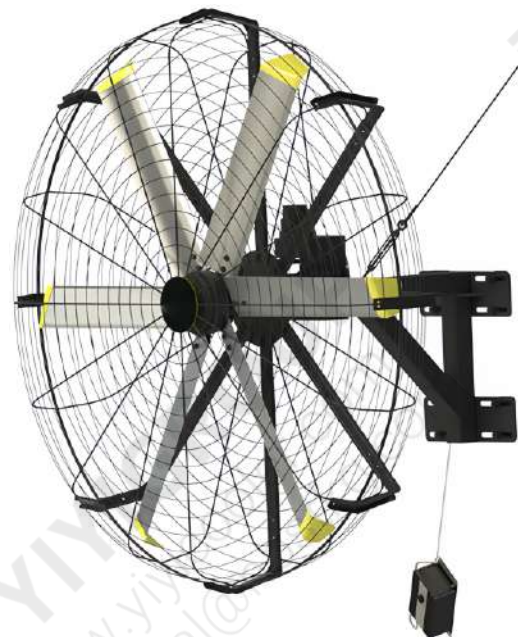

Mobile Industry Fan

The Feng Hang fan is a mobile manual fan. Its airflow that it generates can be transported over long distance and has a wide coverage. Designed stable castor, it's convenient to be moved, fastened and used anytime.

The Feng Qi Fan has a strong air volume and an effective air supply distance of over 24 meters. Some factories have narrow and long passages that are not conducive to ventilation during normal times. It can effectively promote air circulation in the space, achieving the goal of cooling and dehumidifying.

Industrial exhaust fans operate based on the principles of air convection and negative pressure forced ventilation and cooling. It is commonly used in ventilation, cooling and ventilation of various factories and workshops, quickly forcing the hot and humid air in the room to the outside, and improving any poor ventilation problems.

Mobile Industry Fan

Six core: strong wind, convenient movement, 7 speed wind speed, super long distance, super wind speed, green environmental protection. All 6-blade design, using durable light weight reinforced nylon material Dc brushless permanent magnet variable frequency motor, maintenance-free, extended service life.

Permanent magnet stepless speed regulation moving fan

Voltage frequency: 220V/50Hz

Power :400W

Blade diameter: 760 mm (30 inches)

Maximum speed: 900 RPM

Air volume: 25000 m³/h

Air supply distance: 35-40 m

Applicable area:200-300 m²

Net weight :20 kg

Appearance size: 920*480*1070 mm

Fengfei series have strong air volume, effective air supply distance of more than 24 meters, Some factories or logistics storage workshops have long and narrow channels, which are usually not conducive to ventilation. The Fengfei series can effectively promote the air circulation in the space to achieve the purpose of cooling and removing moisture.
